

## Confirmation for the implementation of REACH

The company SIB is a manufacturer and supplier of products based of brass, stainless steel and polymers. These products are in agreement with REACH terminology.

SIB is aware of the European REACH regulation and works since it's promulgation to answer to obligations it imposes about its industrial and commercial activities.

We are in contact with our suppliers and the REACH compliance of materials used in our manufacturing process is an essential element of our approval procedure of suppliers.

Since the 16<sup>th</sup> July of 2019, 4 new chemical substances were added to the SVHC Candidate List, this brings the total number of substances to 201.

To the best of our knowledge and based on the information currently available to us, we count the following candidate substances identified as SVHC and potentially present for concentrations higher than to 0.1% in components of company's articles :

CAS number	Name	Concentration (w/w%)	Annex XIV Authorisation List	Component/ material
7439-92-1	Plomb	≤ 3,5%	Not included	Brass parts
96-45-7	ETU	< 0,5%	Not included	Rubber gaskets (CR)

In accordance with our disclosure obligations, please find below the detail in concentrations of all substances on SVHC candidate list.

In summary, our company is perfectly in line with the REACH regulation to both on the declaration of candidate substances from the SVHC list, and the follow-up of the list of substances subject to authorisation (Annex XIV).

If applicable, it is the responsibility of our customers to check all applicable restrictions for these substances in Annex XVII of the REACH Regulation. The objective is to ensure that final use of products is not among the uses subject to restriction. The list of restricted substances can be found on ECHA website: <https://echa.europa.eu/substances-restricted-under-reach>

We remain at your disposal for further information and please accept, dear Customer, yours sincerely.
